AGRICULTURE is the only business which can practise the decarbonisation of atmosphere simultaneously create highest profit.

The considerable facilitation in work guaranties pleasure and LIFE QUALITY.

Even extended periods of plenty sunshine and heat will elicit users of “Carbon Farming” an enjoyable smile.

Now can the cash crop develop highest quality.

Irrigation in most cases can be conserved and bring money on the farm.

Carbon Farming products reach higher market prices due to approved quality when using for food and feed.

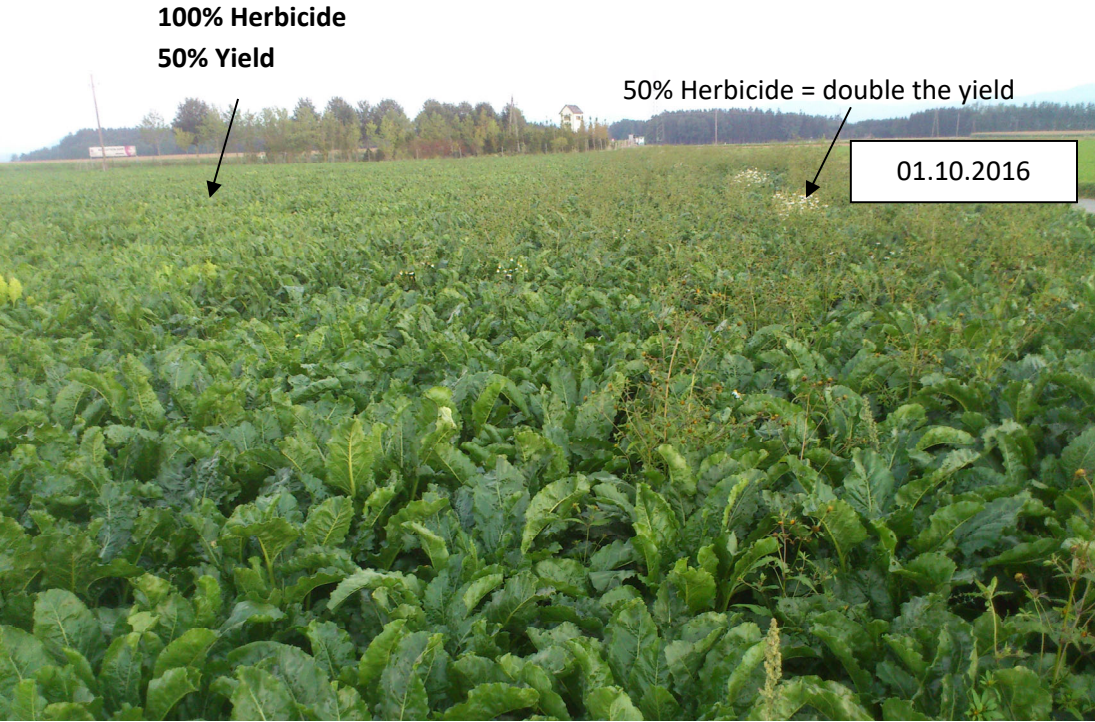

Strong and healty plants will avoid by pest insects as fungus will miss the base to develop.

Economical use of herbicides rise the yield potential, fungizides and insecticides than are neccessary in very few times only=highest HEALTH standard for animal and humans.

If there is used HC in the process of receive application for agro chemical products, it is a legal way to be noted on each packing sold on the market.

The use of HC speed up the remove of toxic resedue in the soil (May-September).

If not declared results in a known falsification of practicable regulations, practised.

Very dry and long heat period.
